

Just what you've been wanting to hear: you can now choose either of your QuietComfort® Earbuds II for listening and calls with Independent Single-Bud Use! Tap here to learn how to activate this feature.

## Independent Single-Bud Use is here!

As great as your QuietComfort® Earbuds II sound together, we know there are times when you want to use just one of your earbuds. You can now use either the left or right earbud for listening and calls with Independent Single-Bud Use. This new feature lets you seamlessly switch between your earbuds, and if one earbud runs out of battery life or disconnects from Bluetooth®, you can continue listening with the other earbud without interruption.

To access Independent Single-Bud Use, make sure the software on your QuietComfort® Earbuds II is up to date. Updating your earbuds' software is quick and easy — just follow the steps below.

**1** **Connect your QuietComfort® Earbuds II** to the Bose Music app to install the new software update.

**2** **Tap "Install Update"** when prompted.

**3** **Tap "Update Now"** and follow the prompts to complete the update.

**4** **Put the earbuds in charging case** when prompted and wait for the update to finish.
